Subject Index

Acaulospora spp. 108
Acetylene reduction assay 165, 173
Acetylene reduction assay (ARA) 39
Acid deposition 130
Added N interaction 102
Alkaline phosphatase activity 242
Ammonia loss 135
Ammonia volatilization 92
Ammonifiers 96
Ammonium excretion 192
Ammonium uptake 192
Anabaena-azollae 192
Anaerobically digested sludge 200
Aporrectodea caliginosa tuberculata 6
ARA 173
Arid soil 35
Arid soils 152
Aromatic substrates 181
Aspergillus rugulosus 35
Aspergillus terreus 35
^{15}N atom% excess 74
Atom% ^{15}N excess 142
Auxine 165
P availability 242
N availability 248
Available nitrogen 195
Available phosphorus 195
Azolla 192
Azospirillum brasilense 165

Bacillus polymyxa 45
Bacteria 55
Bioassay for N and P 195
Biochemical capability 181
Bioindicators 79
Biological activity 50, 242
Biological efficiency 225
Biological N_2 fixation 74, 235
Brown-rotted wood 160
Bulk density 65

Calcareous soils 155
Carbohydrates 65
Carbon mineralization 130
Carbon substrate 125
Chickpea 31
Cicer arietinum L. 31
Cluster analysis 181
Combined first- and zero-order kinetics 135
Common bean 142
Composting 112
Cotton 200
Cowpea 225
Cropland 176

2,4-D 187
DCD 61
Dehydrogenase activity 187, 242
Denitrification 125, 200
Desert soil 200
DHA 187
3,5-dichlor-phenoxy acetic acid 165
2,4-dichlor-phenoxy acetic acid 165
Dicyandiamide 1, 61
^{15}N dilution 74, 235
Diversity 181

Earthworm faeces 160
Earthworms 6, 79
Echinochloa crus-galli 74
Ectomycorrhiza 55
Edafon 79
Electro-ultrafiltration 248
Electron availability 125
Emergence stimulation 45
Enumeration of functional bacterial groups 173
Ergosterol 229
CO_2-C evolution 135
Extraction method 211

Fagus sylvatica 160
Fertilization 85
Fertilizer N 102
Fertilizer use efficiency 74
N_2 fixation 39
Flowing solution culture 39
Fluorescent *Pseudomonas* spp. 147
Forest 176
Forest soil 6, 50
N_2O formation 125
Fractionating organic matter 112
Fumigation 211
Fungal biomass 229
Furrow irrigation 200

Gas chromatography-mass spectrometry 229
Genetically modified micro-organisms 218
Glomus intraradices 229
Glomus macrocarpum 206
Glomus spp. 108
Glutamine synthetase 192
Glycoproteins 65
Grass-legume intercrop 11
Grassland 92
Growth inhibition 45

Heavy metals 181
High performance liquid chromatography 229

N-immobilization 135
Incubation 1
Inoculation 35
Inorganic nutrients 85
Ionizing radiation 79
Irrigation 130
Isoelectric point 112
^{15}N-isotope enrichment 165

Kinetic model 206

Laccaria laccata 55
Lag phase 61
Legume symbiosis 155
Lignin decomposition 160
Lignite-mine soils 25
Liming 130, 248
Lipid extraction 58
Long-term experiment 119
Low molecular weight organic matter 112
Lupin 235
Lupinus angustifolius 235

Maize 211
Methidathion 173
Microbial biomass 176, 187, 211, 242
Microbial biomass N 130
Microbial polymers 65
Microbial populations 187
Microbial reduction 125
Microorganisms 195
Mine spoil 176
Mixed cropping 225
Modulus of rupture 65
Molybdenum 39
Multiphasic uptake 206
Mung bean 35
Mycorrhizae 50
Mycorrhizal corn 206

^{15}N 1, 11, 102
Nematoda 17
Nitrification 135, 187
Nitrification inhibitor 1, 61
Nitrogen 92
Nitrogen deposition 50
Nitrogen fixation 11, 165
Nitrogen immobilization 96
Nitrogen mineralization 96
Nitrogen uptake 225
No-till agrosystem 211
Nodulation 31
Non-linear regression 135
Nursery 147
Nutrient cycling 6
Nutrient uptake 35

Octolasion lacteum 160
Organic fertilization 119
Organic fertilizers 17
Organic phosphorus 35
Organic soil 195
Oryza sativa 85, 102, 147, 225
Oryza sativa L. 108

Particle-size fractions 119
Peat 96, 248
Phaseolus vulgaris 142
Phaseolus vulgaris L. 39
Phosphatase-producing fungi 35
Phospholipid fatty acids 58
Picea abies 130
Plant growth 6, 85
Pre-incubation 152
Pretransplant 85, 147
Priming effect 102, 135
Protozoa 17
Pseudomonas fluorescens 218

Quercus robur 55

Radioactive pollution 79
Rarefaction 181
Reafforestation 17
Reclamation 25
Redox conditions 125
N remobilization 142
Reseed 96
Rhizobacteria 45
Rhizobium 155
Rhizobium spp. 31

Rhizobium spp. combinations 31
Rhizosphere 55
Rhizosphere interactions 147
Rice inoculation 108
Root dry weight 45
Root length 11
Root nodules 39
Rotatoria 17

Saline soil conditions 102
Salinity stress 31
Salt tolerance 31
Savanna 176
Sesbania rostrata 74
Sewage sludge 112, 248
Soil aggregation 65
Soil animals 50
Soil bacterial community 181
Soil biochemical properties 25
Soil column microcosms 218
Soil cultivation 242
Soil depth 152
Soil enzymes 17, 25, 92
Soil fauna 79
Soil microbial adaptation 61
Soil microcompartments 160
Soil microflora 173
Soil microorganism diversity 58
Soil N balance 142
Soil ^{15}N enrichment 235
Soil NH_4^+-N 74
Soil organic matter 119, 152
Soil properties 176
Soil respiration 25, 58, 65, 187
Soil respiration rate 195
Spruce forest 130
Subalpine soil 17
Sulphur deposition 50

Temperature 1
Transport 218
Transuranic elements 79
Typic cryoboroll 11

Upland rice 225
Ca uptake 155
Zn uptake isotherms 206
Urea 92
Urea fertilization 152
Urease 152, 187
Urine 92

A value 142
VAM inoculum 155
Vesicular-arbuscular mycorrhiza 108, 155, 229
Vesicular-arbuscular mycorrhizae 85, 147
Vigna unguiculata 225
Vindhyan hill 176
Vitamin deficiency 58

Water movement 218
Wetland rice 102, 108
Wheat 165
White-rotted wood 160

N yield 11

Zea mays 142
Zea mays L. 206
Zero-order kinetics 61
